

# 4. Delaware (feat. MINDxSET)

Smoking in the driveway to a tune you used to love · No one's selling ashtrays on the street where you grew up · Magicians and pretenders draw the blinds as you walk by · You're a stranger on the sidewalk of the life you left behind · I guess that's right · I'm alive, the water looks fine · Try to taste the wine · And the water looks fine · Dog nose, picket fence, doused in yellow light · There's a monster at the crossroads where the stop sign saved your life · Now it's creeping down the staircase, past the shoes stacked in the hall · Looking out across the barstool towards the wreckage of it all · I guess that's right · I'm alive, and the water looks fine · Dry, drinking blind · You know the water looks fine · No mistake, I'm coming home · You know how my heart aches, dial tone · But life goes on, my love is gone, you're just not what I want or need · Your ghost precedes the worship of a god who was never there · It's over now, Delaware · Make no mistake, I'm coming home · You know how my heart aches, dial tone · But life goes on, my love is gone, you're just not what I want or need · Your ghost precedes the worship of a god who was never there · It's over now, Delaware

# 12. A Duck Named Frog

Good morning to the duck named Frog · That guards this forest · Better wake them up · Last night, they say you dreamt of me · But they won't tell me what it was · It was just a dream · And ducks can't talk, moron · I write letters every day · Don't count on me sending them (ever) · I'm scared of change · Lately, I've been thinking that you hate me · Or maybe I'm just wasted · I don't wanna be alone · And living isn't fun anymore · It's something to be somebody · It's something to be somebody · It's something to be somebody · It's something to be somebody · Silence past, the mind moves fast · Get outta your head, get back in bed · Take your time while staying in line · Bags unpacked, you won't look back · Silence past, the mind moves fast · Get outta your head, get back in bed · Take your time while staying in line · Bags unpacked, you won't look back · Silence past, the mind moves fast · Get outta your head, get back in bed · Take your time while staying in line · Bags unpacked, you won't look back again

# 13. On Forces Pulling Apart/ Chicago, 2024

What a feeling to be seen · Do you love me still? · I whisper to the screen · Oh, little bird, how you've grown · Blue skies are yours to roam · She's found a life that's full of change · She says she's happy and outside it starts to rain · Oh, but the door's left ajar · I'll close it or break it apart · So smile and wave · She wasn't yours to save · Now I'm crying and I can't go back to sleep · Take a walk with me · Through the redwood trees · Where little birds can build their nests and spread their wings · Though I'm feeling all alone · Forces pull apart and that's how people grow · But have I changed at all? · It's been a month and I can't climb out from these walls · I guess it's time to end the call · So smile and wave · She wasn't yours to save · It's okay to cry, it's part of getting old · Under Lassen skies · Little birds will fly · I might miss you, but I'm proud you've found your home

# 5. The People that We Were

You've got your head on my shoulder · It's a beautiful day by the lake · And there's so many words that I would like to say · You'll just have to believe I feel the same · Because I'm counterproductive, built up on old promises that I was too young to keep · You dropped your heart on my shoulder · And I went and I left it in the rain · I should have crawled back, taken it home · Instead I watched the poor picture fade away · Breathing in a puddle of something uncouth · A tiny fraction that would grow in your place · Bitter flavor, hint of escape · That the world had been calling my name · Take me back to see the people that we were · When we were younger we could whisper where no words could be heard · And that old stuffed animal that we made together · You can pick out another name if it makes you feel much better · All I wanted was serendipity in disguise · And then you died · And then you died · And then you died · A rose is romantic, no reason or rhyme · If I stare at the sun, maybe soon I'll go blind

## 2. Life and Death on The Street That Used To Be Royal

El Camino, beneath the tree that cries · The tiniest spark can get so lonely · Let the fire rise · These chords might sound familiar if you've been listening from the start · She tore me apart · And then I made her my god · By now you'd probably think that I'm getting stronger every day · But dismemberment scarred me · I'm still afraid · Camino, lead me home · I'm sorry that I left you when the sun was getting cold · And when I'm old and weary, will you watch me fade away? · Healthy living's just a dream that dies the more you play · Five long years and counting · The bitter god demands you pray · Abandonment plagues you · A quiet kick to the face · Most weeks, life can kill you · So hide the fear behind the screen · That more little birds will build their nests and spread their wings · Camino, I'm alone · I thought you'd make it easy when you sent my parents home · I can't wait for weekends when the walls come caving in · Someday I'll defeat her, then I'll turn and climb again

## 3. The Smoke on Massachusetts

Maybe I'll deprive myself of sleep · We can stay up late holding hands across the screen · Cuz nights like these are few and far between · So let's embrace the fever and live away our dreams · I came back not fourteen days ago · And now I guess I'm stuck with nowhere else to go · So open up your window if you wanna sneak around · Leave your marks below my neck, try not to make a sound · Spring is here and we went home for break · Unpack your bags, we got no time to waste · I'm alive and summer's here to stay · Hello world, you're looking good today · Wake up, feel the fun begin to fade · You can't pass the time just waiting on a change · Mindless routines blur the months into a day · Hey this room don't look familiar, did someone change the paint? · Summer's gone, the sky is turning gray · I thought I learned that nothing's here to stay · Let me out, I've gotta leave this place · I'm breaking down cuz I went home for break

## 6. The Quail and The Cardinal

Curled up inside · There's frost on the window from my compulsive intent · And the cardinal lives across the street · Through miles and miles of asphalt sea · She said "Don't cry · Give me your hand my poor child · It's not worth losing sleep · And the distance couldn't hurt us then · So trust the snow will melt again" · How I tried · Stepping outside · I throw rocks at her door by the light of the screen on my porch · And I watch the pile slowly grow · The silence of my holy ghost · Snowblind, the winter of my discontent · I'm running on empty · The cardinal looked at me and said · "The birds are all inside your head" · Why lie? · Why don't you step outside? · Why don't you step outside? · Why don't you step outside? · Why don't you step outside? · Why don't you step outside? · Why don't you step outside?

## 7. The Fire at The Aquarium (feat. Jackson Sage)

Blackened bile crawls up my throat · Coughing up the ash that came down with the smoke · From the hill where you cried and begged for forgiveness · But god's never given you hope · Across the aisle, the chorus commands · You carve out your skull and punch holes in your hands · So you calmly comply for a cross you forgot · Guess that's just the dream that you lost · Say I wanna stay inside · Watch the fire rise · Till I'm standing on my own · There's no pain like home · Way down, they're just a memory · Use this old guitar as kindling · Take time to hold your heart close · Warm your fingers and your broken bones · Won't you come out? · Come outside · Welcome, B, to the world past your window · Where time trickles down · You're still just a kid who had stars in his eyes · He's trying to reach you · But no one can see where you've been · And I'm not ready to learn · Cuz god knows I'm gonna get burned · Cast expectation aside · When everything dies by the fire · Way down, they're just a memory · Crying tree · Use this tape machine as kindling · They left you on an average day · You'll find a way to ward off change · They left you on an average day · Take time to brace the door frame · You'll see, crying tree · This aquarium won't hold for long · The little birds don't mean to hurt you · Take my hand, I won't desert you now

## 9. Lassen

On the side of the road, there's a chimney all alone · Climb the hill, catch your breath, use my jacket as a sled · Douglas-fir, jeffrey pine, there are giants in the sky · You smile with the snowmelt in your hair · Magic mash, dry and stale, grab a penny for the scale · Minor trip, feeling sick, wearing sweats a size too big · Driving home, hold my hand, someday you'll understand · How you made the best week of my life · On we go, on we go, there's volcanoes in the snow · See the end closing in, promise you'll be home again · Little bird, spread your wings, turn summer into spring · I'll cheer for you, I'll watch you fly away · Waiting up, moving on, took a year to write this song · Looking back, I'd do it again, after all she's my best friend · I hope you're ready for the ride

## 10. The Same Moon, Every Night

Let's burn down some buildings tonight · Let's break all the windows and bus stops in our sight · And if we focus on conventions that might keep us apart · We'll go back to the start · Take this map and find us a way · Hold me closer please and we can dance another day · And if the sky is falling we can make one of our own · And never feel alone · When you're done with your homework, won't you come and step outside? · There's a mountain in my backyard that's waiting to be climbed · And if you find that mankind's prophecies burn up before your eyes · Shut the door and you can walk with me tonight · Let's smoke phototaxis and pot · Let's make several playlists from books we haven't bought · And we can build ourselves a fortress where we'll sleep but never dream · Just blankets and the breeze · Someday I'll look up at the sky · You'll be looking too and we can watch the clouds go by · And if you're lacking the conviction we'll go back and try again · We'll both be home by then · When you're done with your homework, won't you come and step outside? · There's a mountain in my backyard that's waiting to be climbed · And if you find you've lost your appetite and need to rest your eyes · Shut the door so you can walk with me tonight · When the world looks empty, won't you come and step outside? · There's a mountain in my backyard that's waiting to be climbed · And if it's cold you'll grab a sweater, or you can borrow mine · If you step outside and walk with me tonight · If you're feeling lonely, won't you come and step outside? · There's a million miles between us, but I'm hoping that you'll find a place where you can rest your head, and I'll be resting mine · Far apart, it's still the same moon every night · Far apart, it's still the same moon · It's still the same · Still the same moon

## 11. In The Silence That Follows

In the silence that follows · You make your bed and pray to a god you don't believe in anymore · Sand on my skin, sun in my mouth · And a careful eye that's locked onto the door · Total war
